Professional Experience

Microsoft, Product Designer

May 2021 – Present

I develop and implement new interaction and visual design patterns for the Power Platform and Dynamics 365 communities. Additionally, I integrated AI-Copilot into the community framework, thereby optimizing user navigation and enhancing accessibility to essential resources.

Working with cross-functional UX teams, I develop innovative solutions aligning business goals with user needs. My work enhances user onboarding, simplifies searches, and boosts engagement through the strategic integration of gamification elements.

Stockwise, Lead UX Designer

Oct 2019 – Jan 2022

I served as the lead designer for a startup financial application aimed at assisting stock investors in managing and documenting their trading activities. In this role, I closely collaborated with both business and development teams to conceptualize and execute various aspects of the project, including user flow design, wireframing, user interface design, usability testing, and prototyping.

Consortium for Health Action, Lead UX Designer

Aug 2021 – Jan 2022

As lead designer for a healthcare app tracking children's development, I drove design through research, strategy alignment, and creation of user flow, wireframes, UI, and design system.

POW Interactive, Visual Designer

Aug 2019 – Oct 2020

Collaborated with UX Designers at POW Interactive on projects for clients such as Morgan Stanley's app for financial advisors and Perceptronic's military mobile app. Developed branding assets like logos, icons, and style guides, and closely collaborated with developers to ensure seamless design implementation.

Sheer ID, Graphic Designer

Jun 2019 – Aug 2019

Worked with the art director and marketing manager to produce daily brand communication assets like infographics, page designs, and hero images for websites. Also responsible for editing and updating HTML5 and CSS3 code on the company website.
